

HOME CARE ADVICE

<http://www.yuhei.co.uk/home-care/>

START 

Soak entire hair and rinse out styling products, dirt and oil etc... thoroughly from your hair.

Shampoo

Shampoo your scalp, not the actual hair itself.

Yuko Kokoro G, Lock In
Colour, Frizz Care or
Bella

STEP 1

It is much kinder to apply shampoo **bubbles** to your, rather than applying the shampoo itself directly to your hair.
* If you are using styling products, we recommend to do bubbles shampoo twice.

STEP 2

Rinse out the foam thoroughly.

Treatment

Treatment should be applied every time you shampoo your hair.

Yuko Kokoro G, Lock In
Colour, Frizz Care,
Damage Care or Bella

STEP 1

Apply treatment on the ends of your hair (not the scalp)

STEP 2

You should **never rinse off the treatment completely.**
(If you applied treatment on your scalp, you need to rinse well, but recommend to leave for hair end.)

Towel-drying

Sponge up as much water as possible by wrapping hair in a towel gently.

* Wiping off the water by rubbing vigorously with the towel will damage your hair.

 Tip!

Apply Daily Care Smoothing Conditioner to protect hair from heat and nourish it.

Blow-drying

It is the scalp that needs to be dried more than the ends of the hair.
Dry the hair from the nape area and remember to blow downwards.

* The hair at the top will not over dry.
* Avoid leaving the hair wet.
The moisture left in the hair can cause it to become damaged.

 Tip!

Use a hair clip for the top part of the hair and **gradually dry in sections.**

Finish !!

 Tip!

Use **MIST OIL** to add gloss and shine on the hair.
Spray small amount on your palm and apply evenly on hair ends.
* For the coloured hair, mix with **MIST OIL** and **tiny amount of Kokoro G or Lock in Colour treatment** and apply hair ends to keep hair more moisturised all day.
